I am [Lindani Lucky Thango](#) a Freelance Graphics living in a world where design is not an option; I just have to do it. I started designing from 2012 Ever since then, I've been constantly striving to improve my skills. I've had 3 years to learn from mistakes and build from them.

Two of those years I spent designing professionally for Start-up brands. In my line of work, I find it crucial for all brands to communicate effectively with its audience; Although their audience may be from different provinces, we all speak the language of design and it's my job to make sure my clients understand their audience and their audience understands their brand.

A great Logo should be able to tell the same story no matter how the viewer perceives it. I don't know everything about design but i know it's important to Understanding how great design works and having the ability to show others the importance of a well thought out beautiful design.

Working on videos and free tutorials is a full-time job for me. Everyday I research, develop, shoot, edit, and produce video Tutorials so that you (The Fans and Artists!) can watch them for Entertainment and Education. While I receive an extremely low revenue for making YouTube videos, this money goes directly back into running my small production company [Warten Weg](#).

Sincerely,

  
Lindani Lucky Thango
