

LED MIRRORS CATALOGUE

RUKE.EU

It gives us great pleasure to present our latest catalogue with our brand new selection of mirrors. Our highly specialised knowledge and 30 years of experience, combined with the commitment of our staff, are our guarantee of superlative quality, visual appeal and safety. Our stringent production processes, which comply with the ISO:9001, TÜV Nord, and IP441 standards, are further proof that the trust and satisfaction of our customers are fully justified. RUKE mirrors are strongly positioned in a country that has long been recognized throughout Europe.

QUALITY, INNOVATION, AESTHETICS—THESE ARE THE INVARIABLE ELEMENTS OF OUR PHILOSOPHY, AND WE EXPRESS THEM THROUGH OUR PRODUCTS.

All our mirrors are made from components and materials manufactured in Europe, using state-of-the-art equipment. We are open to the needs of our customers. We provide practical solutions, but we also set new directions, constantly improving our mirrors and equipping them with even more functional accessories. The final product never fails to impress with its aesthetics, precise craftsmanship, and attention to detail.

This catalogue presents a broad selection of mirrors of the finest quality, and a rich range of accessories. We are convinced that our product flexibility will allow you to select the perfect solution for your bathroom, hallway, or bedroom.

¹ISO 9001 - Quality Management Systems; TÜV Nord – Product safety and environmental friendliness; IP44 – Protection against intrusion (44 = resistant to water and solids > 1 mm).

ADDITIONAL INFORMATION	96
------------------------	----

EVEN MORE OPTIONS

DUAL SYSTEM - Our optimally configured hanging brackets system enables the mirror to be positioned vertically and horizontally. The position can be changed any time.

EVEN MORE LIGHT

Our high quality LED strips and light covers, along with our specially designed installation technique, let you focus as much light as possible and gently diffuse it wherever you wish. Optimal clearness and brightness can therefore be achieved without any glare.

EVEN MORE PROTECTION

All our mirrors have a thick Teflon layer to protect them from corrosives present in e.g. the bathroom. You can enjoy a spotlessly clean mirror for many years.

ADVANCED BACK COVER SYSTEM

All the standard size mirrors come with our advanced design back cover which enables easy installation, durability and user's safety.

ACCESSORIES

COLOURED LIGHT EMITTING DIODES (LEDS)

An RGB LED enables the mirror lighting colour to be changed at anytime. The light is controlled via an attached remote control. You can choose from 19 colours, 19 dynamic modes, and 5 brightness levels.

LED CLOCK

An innovative LED illuminated clock installed in the back panel of the mirror is extremely practical. The display is 2 cm high and 5 cm wide. The clock is not battery-operated. It is available in four colours (white, orange, blue and red).

BLUETOOTH MODULE

Listen to music without leaving your bathroom. Simply connect your mobile device via Bluetooth and the mirror will serve as speakers.

DEMISTER PAD

A demister pad is perfect for your everyday bathroom activities. The pad stops the mirror getting steamed up, and keeps the panel dry and the reflection clear (the pad removes the vapour from the middle of the mirror).

MAGNIFYING MIRROR

A small round mirror installed in the main panel makes your everyday bathroom operations easier. The mirror can be additionally illuminated by placing an LED strip around it. The mirror does not protrude from the main panel, but forms a smooth and even surface. It has x3 or x5 magnification and a diameter of 14.5 cm (or 18 cm with the additional LED strip).

SHAVER SOCKET

There is a shaver socket on the side of the mirror. This not only makes shaving more convenient, but you can also connect your hair dryer and recharge your mobile phone.

ACCESSORIES

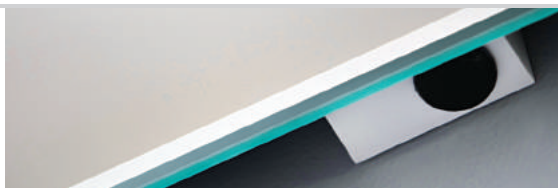

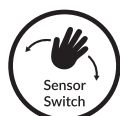

TOUCH BUTTON SWITCH

The mirror lighting can be turned on or off with the touch of a finger. The touch button switch does not protrude from the mirror, so the panel remains smooth and even. LED lighting allows you to find the switch in a dark room without any problems. The switch is blue in active mode and green in standby mode. It turns the mirror light off automatically after 30 minutes.

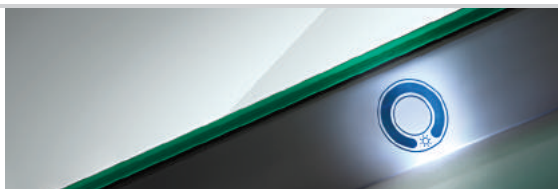

TRADITIONAL SWITCH

A rocker switch is easy to use and completely reliable. It is mounted behind the edge of the mirror, making it invisible from the front.

SENSOR SWITCH

An infra-red sensor can activate the mirror with a hand movement 3-7 cm away. It is installed in a sealed casing behind the mirror. The touchless operation makes it especially hygienic and convenient. The switch can be activated with wet hands.

DIMMER

This increases or reduces the brightness of the light in order to achieve the desired effect. Brightness is regulated by pressing the area marked with a sticker and holding it until the desired brightness is achieved. Maximum brightness is signalled by a double flash.

VISION MIRROR

Vision Mirror is a smart mirror that enables you to enjoy your comfort in a different way. The sensor system activates automatically whenever your presence is registered. The mirror connects to the Internet via Wi-Fi and allows the communication with other Bluetooth devices. The mirror comes with a specially designed, user-friendly, intuitive menu that can be adjusted to your individual needs. Vision Mirror also allows you to install your favourite applications and access all the tools you need in your daily activities.

IP class: **IP44**
 Mirror depth: 30mm
 Rear cover: PCV
 Power supply: 230V~50Hz
 Resolution: 4k

Available technologies:

3D GLASS SERIES

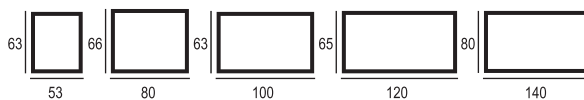

DIAMOND

This is a series of 3D mirrors that exploit the hypnotizing effect of depth. Diamond-shaped illumination gives the impression that there is a diamond enclosed in the crystal glass mirror panels.

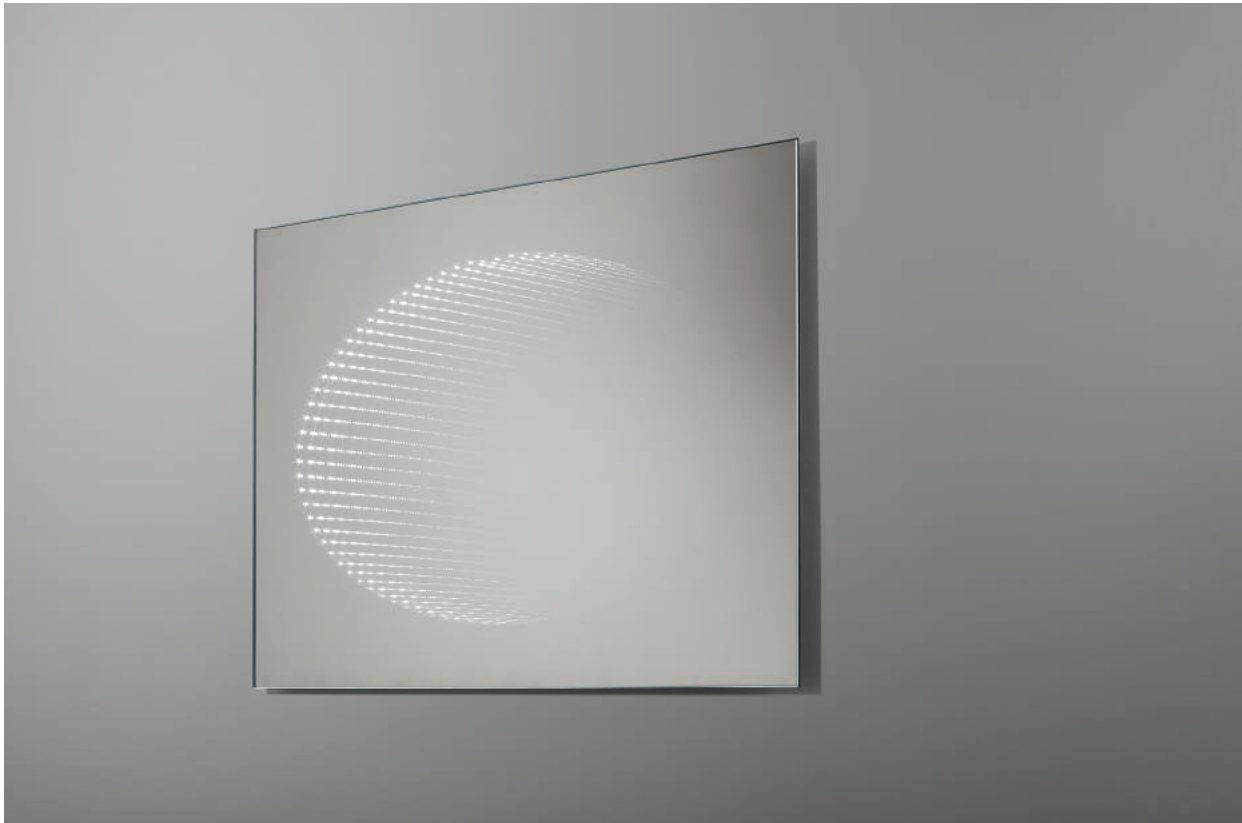

IP class: **IP44**
 Mirror depth: 34mm
 Rear cover: PCV
 Power supply: 230V~50Hz
 Light colour: Warm 2800-3200K (Option)
 Natural 4000-4500K (Option)
 Cool 6000-6500K (Standard)

Name	Index	Dimensions(cm)	Power
Diamond 53	0403_427	53x63	12W
Diamond 80	1516_453	80x66	14W

Eclipse 140	7403_687	140x80	32W

Available technologies:

3D GLASS SERIES

PLANET

An extremely original proposition that will add any interior arrangement a unique character. The LED lights based on the 3D construction are run around the perimeter of the mirror, which results in the effect of a three-dimensional tunnel.

IP class: **IP44**

Mirror depth: 34mm

Rear cover: PCV

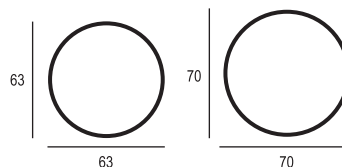

Power supply: 230V~50Hz

Light colour: Warm 2800-3200K (Option)

Natural 4000-4500K (Option)

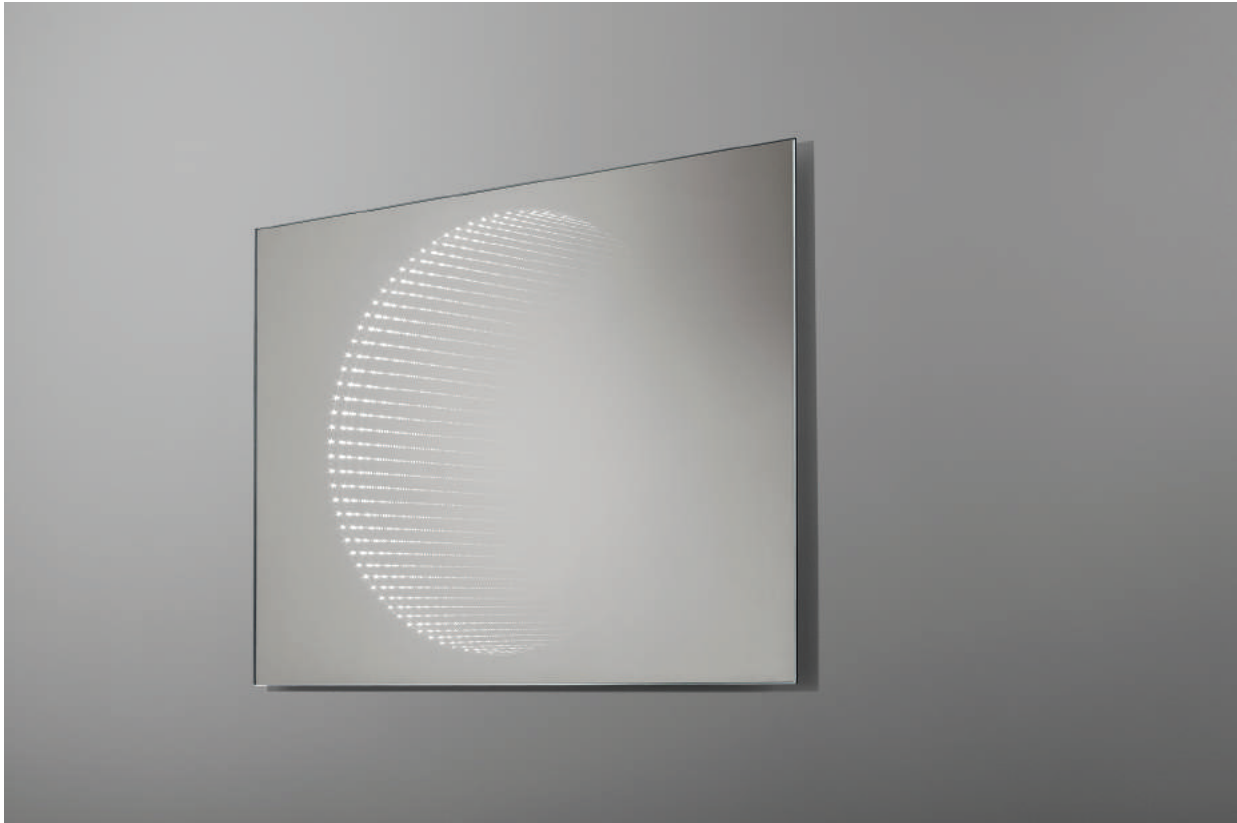

Cool 6000-6500K (Standard)

Name	Index	Dimensions(cm)	Power
Planet 63	8714_401	63x63	19W
Planet 70	8721_440	70x70	21W

Available technologies:

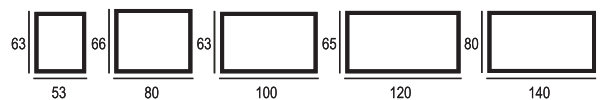

VISION

The lighting utilises the mirror's roundness and its impression of being three dimensional to create the illusion of an open and deep space that expands the room visually and adds a touch of fantasy and magic.

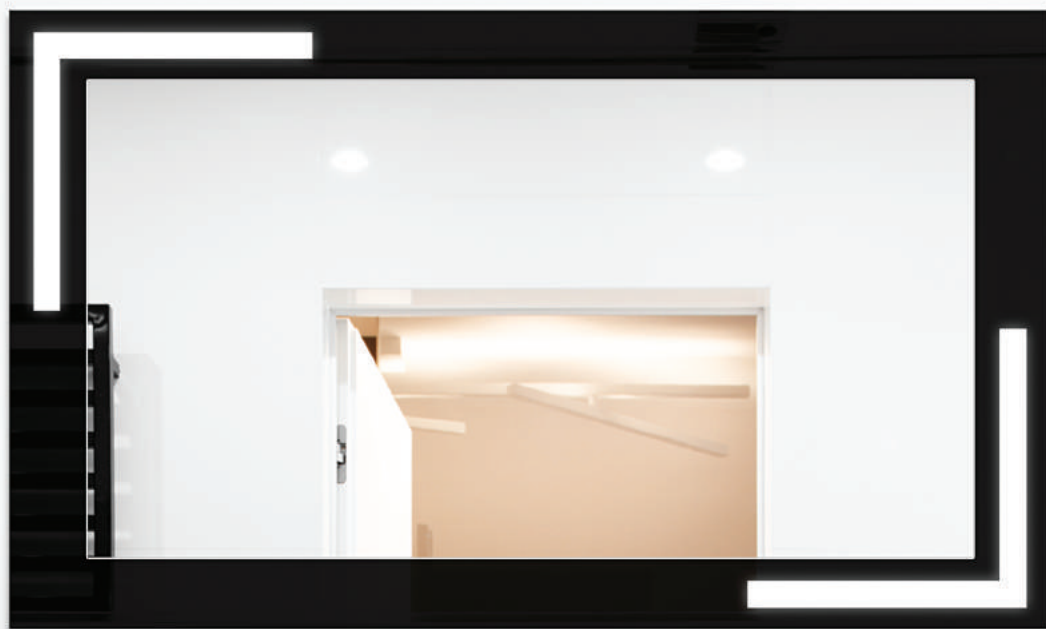

IP class: **IP44**
 Mirror depth: 34mm
 Rear cover: PCV
 Power supply: 230V~50Hz

Arrows 120	9391_518	120x65	15W

Available technologies:

DECOR SERIES

AURORA

The LED-illuminated Aurora mirror has been created especially for people who appreciate elegant and classic design. A frosted glass base, combined with a crystal mirror panel, with soft light running through the milky surface, lend the room an aura of luxury.

IP class: **IP44**

Mirror depth: 34mm

Rear cover: PCV

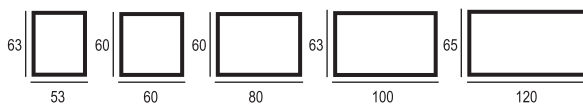

Power supply: 230V~50Hz

Light colour: Warm 2800-3200K (Option)

Natural 4000-4500K (Option)

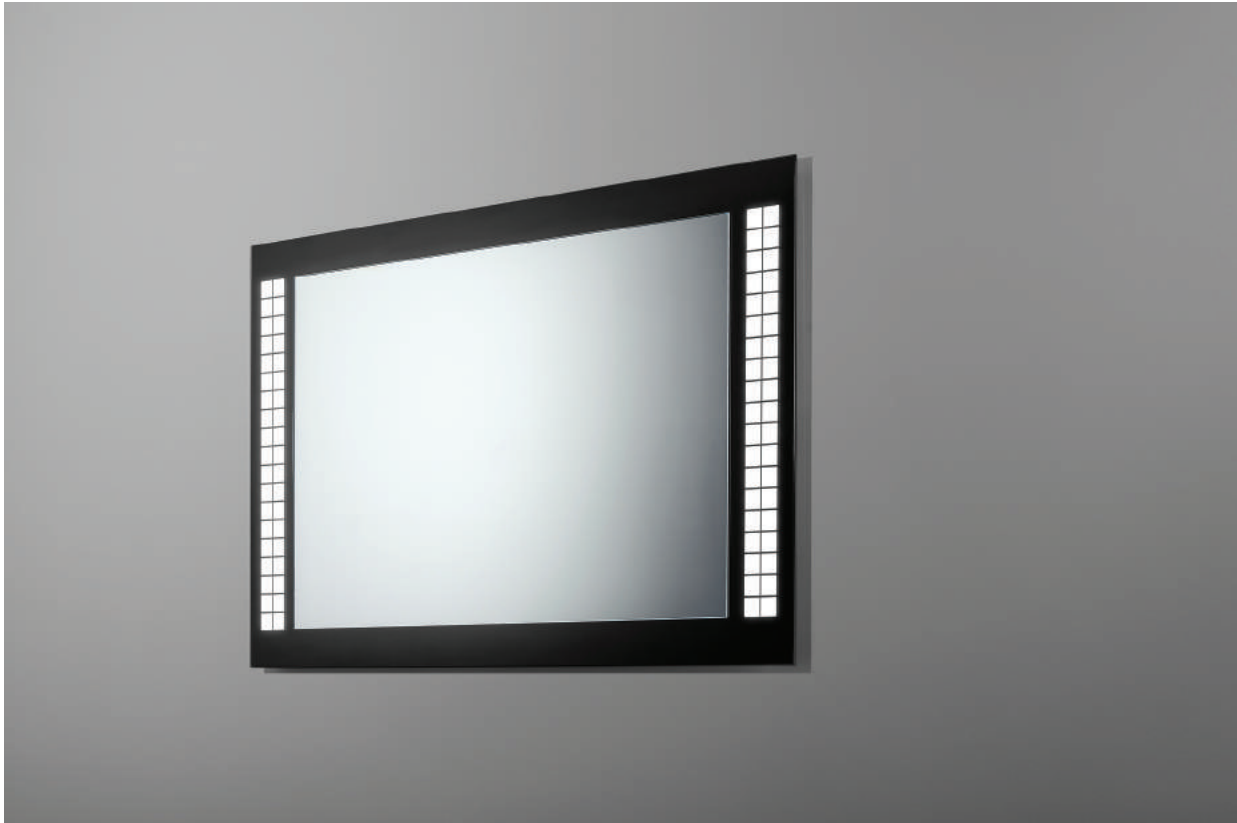

Cool 6000-6500K (Standard)

Name	Index	Dimensions(cm)	Power
Aurora 53	4600_334	53x63	16W
Aurora 60	1530_349	60x60	17W
Aurora 80	1547_388	80x60	20W
Aurora 100	4969_461	100x63	27W
Aurora 120	9209_544	120x65	30W

Available technologies:

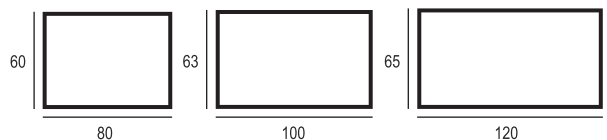

CUBI

Their geometrical forms, layered construction, and clear colour scheme enable Cubi mirrors to give any room its own special appearance and expressiveness. The deep black of the glass base is a stark contrast to the crystal mirror and the LED lighting, which takes the form of a row of regular squares.

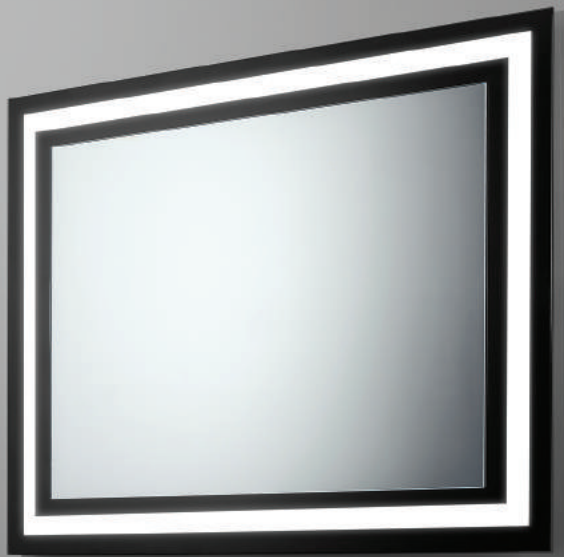

IP class: **IP44**
 Mirror depth: 34mm
 Rear cover: PCV
 Power supply: 230V~50Hz
 Light colour: Warm 2800-3200K (Option)
 Natural 4000-4500K (Option)
 Cool 6000-6500K (Standard)

Name	Index	Dimensions(cm)	Power
Cubi 80	1578_427	80x60	14W
Cubi 100	7069_466	100x63	14W
Cubi 120	9254_518	120x65	15W

Available technologies:

VITRUM

The Vitrum model is part of a series of dual-layered compositions that use an advanced LED light. Black pearl varnished glass is used as an underlay for the crystal panel and the lighting is sandblasted around it. The whole design creates a very attractive and elegant look suitable for interiors that require a distinctive accent.

IP class: **IP44**

Mirror depth: 34mm

Rear cover: PCV

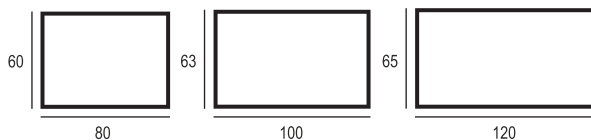

Power supply: 230V~50Hz

Light colour: Warm 2800-3200K (Option)

Natural 4000-4500K (Option)

Cool 6000-6500K (Standard)

Name	Index	Dimensions(cm)	Power
Vitrum 80	2193_401	80x60	20W
Vitrum 100	2209_440	100x63	27W
Vitrum 120	0137_479	120x65	30W

Available technologies:

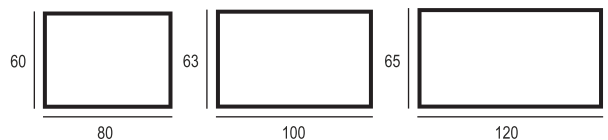

ZEBRA

The Zebra is a somewhat exotic proposal. This unconventional design is a nod to modernism. The base glass is sandblasted in such a way as to interweave the LED lighting with the black varnished panel. The result is a very eye-catching pattern. This mirror is a perfect complement to modern interior arrangements.

IP class: **IP44**
 Mirror depth: 34mm
 Rear cover: PCV
 Power supply: 230V~50Hz
 Light colour: Warm 2800-3200K (Option)
 Natural 4000-4500K (Option)
 Cool 6000-6500K (Standard)

Name	Index	Dimensions(cm)	Power
Zebra 80	2292_344	80x60	14W
Zebra 100	7144_383	100x63	14W
Zebra 120	0175_409	120x65	15W

Available technologies:

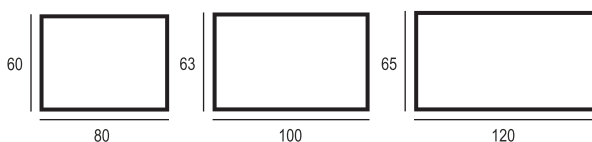

ZENITH

The Zenith combines a varnished glass base with a crystal mirror. The bulky look of black Lacobel is softened with a delicate lighting pattern in the form of points of light that give the impression of shiny pearls. The Zenith is ideal for interiors that require a distinctive accent.

IP class: **IP44**
 Mirror depth: 34mm
 Rear cover: PCV
 Power supply: 230V~50Hz
 Light colour: Warm 2800-3200K (Option)
 Natural 4000-4500K (Option)
 Cool 6000-6500K (Standard)

Name	Index	Dimensions(cm)	Power
Zenith 80	2308_396	80x60	27W
Zenith 100	2322_453	100x63	31W
Zenith 120	0212_518	120x65	35W

Available technologies:

SILVER SERIES

SILVER SERIES

AERO

Aero mirrors catch the eye with their low-key and unobtrusive appearance. The characteristic features of this model are its intriguing shape, reminiscent of a fan, and its two rows of small lights that resemble strings of pearls.

IP class: **IP44**

Mirror depth: 34mm

Rear cover: PCV

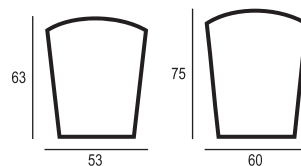

Power supply: 230V~50Hz

Light colour: Warm 2800-3200K (Option)

Natural 4000-4500K (Option)

Cool 6000-6500K (Standard)

Ares 100	4142_495	100x63	14W
Ares 120	4159_554	120x65	15W

Available technologies:

SILVER SERIES

CALYPSO

The Calypso bathroom mirror is an unusual proposition for fans of modern design. The innovative lighting, in the form of very bright streams flowing towards the centre of the mirror pane, not only looks great, but also allows you to comfortably perform everyday treatments, such as shaving or makeup.

IP class: **IP44**

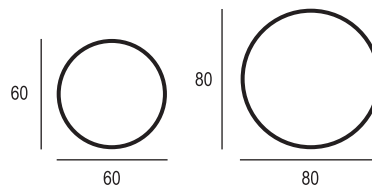

Mirror depth: 28mm / 32mm

Rear cover: PCV

Power supply: 230V~50Hz

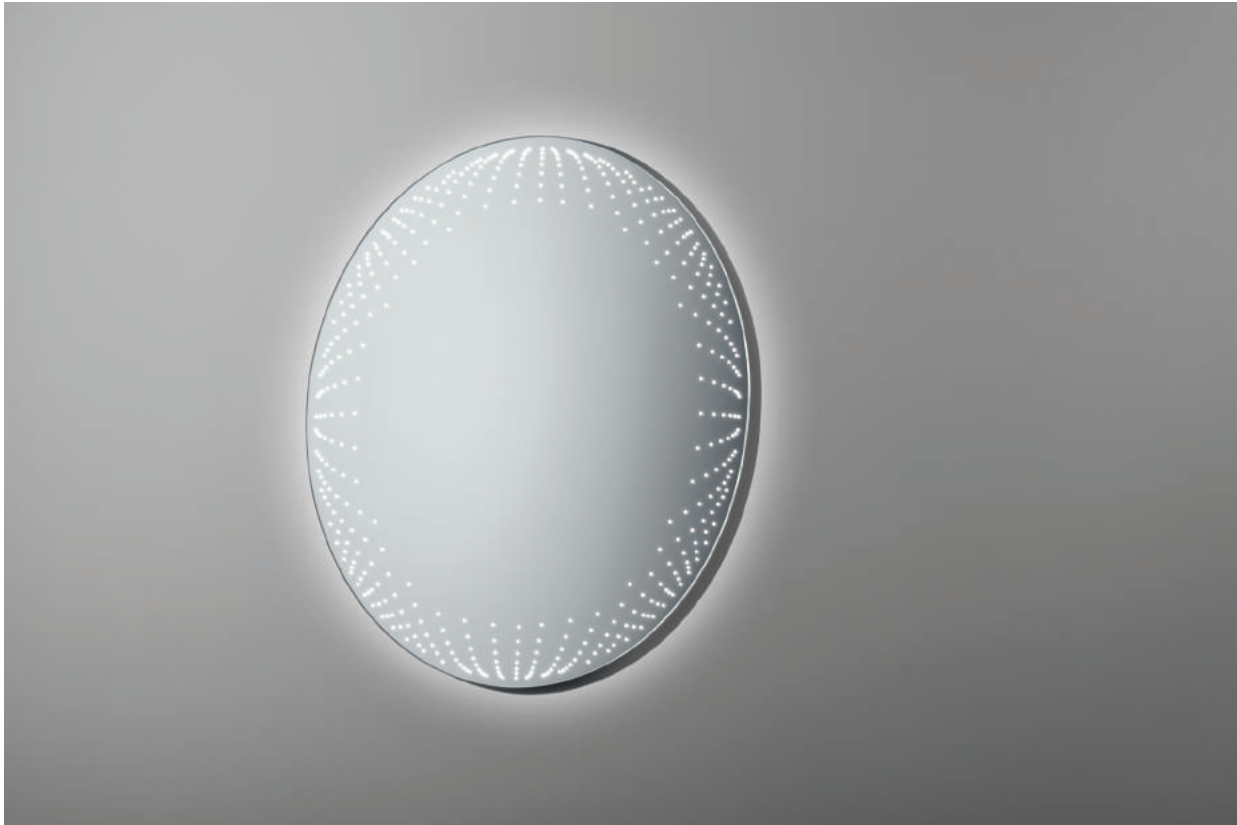

Light colour: Warm 2800-3200K (Option)
 Natural 4000-4500K (Option)
 Cool 6000-6500K (Standard)

Name	Index	Dimensions(cm)	Power
Calypso 60	3787_418	60x60	16W
Calypso 80	4982_540	80x80	20W

Available technologies:

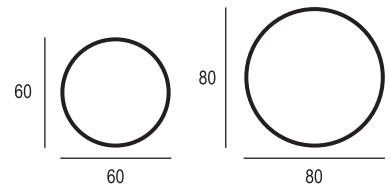

CALLISTO

The light pattern in the Callisto bathroom mirror is reminiscent of the subtle luminous rays. The delicate light is quite strong and effective thanks to the strong LED lights.

IP class: **IP44**
 Mirror depth: 28mm / 32mm
 Rear cover: PCV
 Power supply: 230V~50Hz
 Light colour: Warm 2800-3200K (Option)

Name	Index	Dimensions(cm)	Power
Callisto 60	3794_418	60x60	16W
Callisto 80	4999_540	80x80	20W

Available technologies:

SILVER SERIES

CASSIOPEIA

The Cassiopeia bathroom mirror is a proposal for fans of avant-garde design. The round mirror panel has been decorated with spectacular light rims, which make the model look very elegant, especially in modern stylizations.

IP class: **IP44**

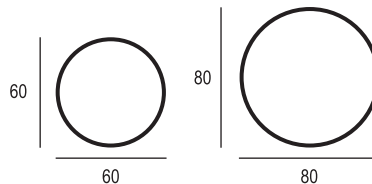

Mirror depth: 28mm / 32mm

Rear cover: PCV

Power supply: 230V~50Hz

Light colour: Warm 2800-3200K (Option)
Natural 4000-4500K (Option)
Cool 6000-6500K (Standard)

Name	Index	Dimensions(cm)	Power
Cassiopeia 60	3800_418	60x60	16W
Cassiopeia 80	5002_540	80x80	20W

Available technologies:

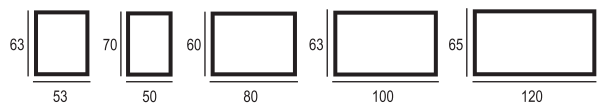

CHIMERA

The Chimera model is a very impressive proposition for everyone who is looking for unusual solutions in design. The rectangular, well-polished pane of mirror was illuminated by a wide, dashed band running along the perimeter of the mirror. The use of the very strong LED diodes allow for optimal illumination of the entire mirror surface.

IP class: **IP44**
 Mirror depth: 36mm
 Rear cover: PCV
 Power supply: 230V~50Hz
 Light colour: Warm 2800-3200K (Option)
