Dr. Leonard Umanoff, DDS

Dr. Leonard Umanoff is regarded as one of [the best dental implants specialist in Brooklyn](#), NY. Dr. Umanoff has mastered his craft of implantology and not only focuses on the placement of dental implants but everything involved in the process such as bone grafts, sinus lift, and final restorations.

Dr. Leonard Umanoff began his dentistry career in Moscow, Russia where he graduated at the top of his class from Moscow State University of Medicine and Dentistry in 1995. After immigrating to the U.S. and settling in New York, Dr. Umanoff graduated from the New York University School of Dentistry in 1999. In 2001, he opened his first private practice in Sheepshead Bay, Brooklyn with the goal of helping people achieve both healthy and beautiful smiles.

Dr. Umanoff has over 20 years of experience, degrees from two countries and treats every patient like a member of his extended family. His handpicked team of dental specialists has helped over 10,000 patients and has completed over 6,000 successful dental implant cases. By employing only the latest technology and most advanced equipment, Dr. Umanoff is known for the most effective diagnosis, planning, and treatment of virtually all dental and/or oral problems. It's no surprise that he's considered Brooklyn's expert in Dental Implants and Restoration.

Renowned dental implant specialist, Dr. Umanoff strives to be on the edge of new advances and continues to travel the world continuing his education to ensure that all his patients receive only the most comprehensive and highest quality of dental care available. This has helped him to not only maximize the effectiveness but minimize the length of treatment.

CLEANINGS

Sirona Orthophos SL

The Sirona Orthophos SL 3D imaging system is a technological marvel giving us the ability to reconstruct your full mouth in both panoramic 2D and 360 degree 3D x-rays. This amazing machine allows us to virtually plan treatment which leads to effective and predictive results. It works in conjunction with our 3D printer to create surgical guides and models.

Sidexis, Treatment Planning Software

Sidexis is the award winning imaging software that works in conjunction with our Orthophos X-Ray machine. It efficiently structures our workflow in its modern and intuitive design and serves as a basis for further planning and diagnosis.

Cerec Single Visit Crowns

CEREC Single visit crowns are the ultimate in digital dentistry today. Perfect for emergency visits and same day restoration, your crown can be measured, planned, milled from a block of appropriate material and fitted the very same day.

Versah® Osseodensification Burs

Versah® Osseodensification Burs are a revolutionary way to drill into the jaw bone for implant insertion. These drills and burs are extremely unique in that they rotate the opposite way of a traditional bur. This option is perfect for those patients whose jaw ridge is not sufficient enough or too narrow.

Formlabs Form 2 3D Printer

The newest in 3D printing technology, the Form 2 creates strong, detailed dental models with a stunning surface finish. It is the most reliable and advanced printer created with a compact desktop design. This greatly expedites the process and since everything is done in house, quality control is strictly monitored.

inLab MC X5

The inLab MC X5 was designed as a universal five-axis production unit to meet dental lab requirements for cost-efficient production. The inLab is capable of producing almost all outsourced lab work including all kinds of crowns (temp and regular), dentures, bridges, metal try-ins, custom and prefabricated implant abutments, etc.
