

Cold Forged & Turned Precision Fasteners

Shining Jins Enterprise concentrates our attention on quality, cost, innovation and safety in any production process.

We devote to cold forging technology and secondary processes with over hundreds of items manufactured from various materials including aluminum, carbon steel, alloy steel and stainless steel.

With computer system control and personal inspection, we confidently ensure our parts are reliable and available on time for your production processes.

Customers have the benefit of satisfaction and contentment on production processes and products.
